

Minor Landscape Change Application Checklist for Propane tanks & Generators.

Required application items:

- _____ Review Fee
- _____ Pictures of the house elevations as seen from public realm.
- _____ **Identify** proposed generator and/or propane tank location on property via current survey or site plan and provide photos of surrounding area. If proposed location is close to neighboring property, provide photos showing clear proximity.
- _____ Show location of associated **utility trenches** on site plan to verify they do not interfere with the drip line of trees.
- _____ Provide proposed screening plan as needed.

Note: Propane tanks, generators and/or coordinating gas lines may not be placed in or go through the filtration buffer between critical line & OCRM buffer line. Please contact the TOMP for additional location restrictions for each.

*The TOMP requires homeowners to get a permit for generators and propane tanks and any structural platforms for generators require a zoning letter and proposed building lot coverage calculations for IDC review.
