Required application items:

 Review Fee		_Signed Homeowner Agreement	
 Pictures of the house elevations	tur es of the house elevations as seen from public realm.		
 location & associated utility trenche proposed location on the site plan.	es on property. Provide photo ocation and as ny existing tree	ssociated utility trenches to verify they es. If proposed location is close to	
 Provide proposed screening plan realm.	as needed.	Must be screened from public	

<u>Note</u>: Propane tanks, generators and/or coordinating gas lines may not be placed in or go through the filtration buffer between critical line & OCRM buffer line. Please contact the TOMP for additional location restrictions for each.

*The TOMP requires homeowners to get a permit for generators and propane tanks and any structural platforms for generators require a zoning letter and existing & proposed building coverage calculations for IDC review.
